
TRADE MARK **WELLCOME** BRAND

Anti-gonococcus Serum

Especially indicated in generalised gonorrhoeal infections, such as gonorrhoeal rheumatism and endocarditis. Used by some clinicians in acute cases to hasten recovery and prevent general infection.

Intramuscular and intravenous injections are sometimes preferred to the more usual subcutaneous method.

Supplied to the Medical Profession, in hermetically-sealed phials of 25 c.c.

TRADE MARK **WELLCOME** BRAND

Gonococcus Vaccine

Indicated in the chronic and later stages of gonorrhoea.

Specially recommended in cases of gonococcal iritis.

Supplied to the Medical Profession, in hermetically-sealed phials of 1 c.c., containing 5, 20, 200 or 1000 million organisms.

Also, to special order only, in rubber-capped bottles of 10 c.c. and 25 c.c.
