

MSSVD

The Medical Society for the Study of Venereal Diseases

President: Dr M A Waugh, The General Infirmary at Leeds, Leeds, LS1 3EX

The object of the Society is to bring together those interested or engaged in the diagnosis, treatment, and community medical aspects of sexually transmitted diseases. The Society meets regularly in London at the Royal Society of Medicine for the reading of papers, discussions, and presentation of cases. An out-of-London meeting is held in the Spring. Annual subscription for membership of the Society is £50.

Applications for membership are welcome and forms can be obtained from the Honorary Secretary, Dr M J Godley, Florey Unit, Royal Berkshire Hospital, Reading RG1 5AN.

Please note—all correspondence regarding MSSVD to Hon Sec save all changes of address to Hon Treasurer Dr J S Bingham, Middlesex Hospital, London W1N 8AA.

Meetings 1990

6.30 p.m. for 7.00 p.m. unless otherwise stated

Members and Guests welcome

Royal Society of Medicine, 1 Wimpole Street, London W1M 8AE

9th February 1990—Papillomavirus—Anogenital warts—local ablative therapy—Dr J D Oriel, London Interferon Therapy—Dr G M Scott, University College Hospital, London
Intra-meatal warts—Overview of therapy—Mr T A McNicholas, FRCS, St Peter's Hospital, London

23rd March 1990—Research into Sexual Behaviour in the context of HIV infection—The measurement and assessment of homosexual behaviour in the context of HIV transmission—Prof A P M Coxon, University of Wales, Cardiff
National survey of sexual attitudes and lifestyles—Dr A M Johnson, University College and Middlesex School of Medicine

9–11 May 1990—STDS in the World of AIDS. 35th General Assembly IUVDT, Royal Society of Medicine, London

17–20 May 1990—SPRING MEETING, MSSVD. Shanklin, Isle of Wight, Local Organiser: Dr C Baksi

**Think
about
it**

You make a clinical diagnosis. Do you ever consider the thought processes by which you arrived at it? Medical students and practitioners are often concerned with examples of diagnostic logic, but seldom consider them in the context of a general philosophy. Is diagnostic logic out on a limb, or is it based on the same principles as logic in general?

In *Logic in Medicine* doctors and philosophers combine to provide a coherent system of diagnostic logic with a broader view of the science and art of reasoning.

LOGIC IN MEDICINE

IN VAGINAL THRUSH, THEIR NEEDS ARE NOT IDENTICAL

ABRIDGED PRESCRIBING INFORMATION: **Presentation** *Canesten 10% VC* is available as a single pre-filled applicator containing 5 g of 10% clotrimazole vaginal cream. **Uses** Candidal vaginitis. **Dosage and Administration** *Adults* Insert the contents of the pre-filled applicator intravaginally, preferably at night. *Children* As this product is used with an applicator, paediatric usage is not recommended. **Contraindications** Hypersensitivity to clotrimazole. **Side Effects** Rarely patients may experience local mild burning or irritation immediately after inserting the cream. Hypersensitivity reaction may occur. **Use in Pregnancy** In animal studies clotrimazole has not been associated with teratogenic effects but following oral administration of high doses to rats there was evidence of foetotoxicity. The relevance of this effect to topical application in humans is not known. However, clotrimazole has been used in pregnant patients for over a decade without attributable adverse effects. It is therefore recommended that clotrimazole should be used in pregnancy only when considered necessary

by the clinician. If used during pregnancy extra care should be taken when using the applicator to prevent the possibility of mechanical trauma. **Accidental Oral Ingestion** In the event, routine measures such as gastric lavage should be performed as soon as possible after ingestion. **Pharmaceutical Precautions** Do not store above 25°C. **Legal Category** POM. **Basic NHS Price** £3.43 per 5g pre-filled applicator. **Product Licence Number** PL 0010/0136. **Reference** Genitourinary Medicine 1986; 62:404.

Even women as similar as twins can have very different needs when it comes to vaginal thrush.

While many women are content with the convenience and efficacy of a single-dose pessary, others may need a cream.

Canesten 10% VC is the only single-dose cream for vaginal thrush.

It is specially formulated for cases where vaginal

soreness or dryness is a problem, and for those who simply prefer a cream.¹

Canesten 10% VC. It gives you — and your patients — a soothing alternative when treating vaginal thrush.

Canesten[®]

SINGLE-DOSE CREAM, THE SOOTHING ALTERNATIVE

You're looking at a complete course of Diflucan 150 for vaginal thrush

Prescribing Information ▼

Indications: 1. Acute or recurrent vaginal candidiasis. 2. Oropharyngeal candidiasis including that occurring in immunocompromised patients. 3. Atrophic oral candidiasis associated with dentures. Dosage: Adults: Vaginal candidiasis: Single dose of 150mg. Oropharyngeal candidiasis: 50mg once daily for 7-14 days. Treatment should not exceed 14 days except in severely immunocompromised patients. Atrophic oral candidiasis: 50mg once daily for 14 days plus normal dental hygiene measures. Use in elderly: as above except for those renally impaired - see data sheet. Use in children: Not recommended. Contra-indications: Hypersensitivity to fluconazole or related triazoles, pregnancy and women of childbearing potential unless adequate contraception is employed. Warnings: Lactation: Not recommended. Drug interactions: Monitor patients on concurrent anticoagulants or tolbutamide. Side-effects: Nausea, headache, abdominal discomfort. Package Quantities and Basic NHS Cost: 150mg capsules, pack of 1, £7.12. (PL 57 0290). 50mg capsule, calendar pack of 7, £16.61 (PL 57 0289). Further information on request.

DIFLUCAN 150, in a single oral dose, deals effectively and elegantly with vaginal candidiasis.

Studies have produced a clinical response rate of 97%. And you will, of course, spare your patients the messiness, leakage and vaginal irritation associated with topical treatments.

During clinical trials, a group of patients able to compare single oral dose Diflucan 150 with a past topical treatment left investigators in no doubt. All preferences were for Diflucan 150.

A comparative study has clearly shown that Diflucan 150 outperforms intravaginal clotrimazole, both in speed of symptom relief and overall long-term results.

Treatment with Diflucan 150 is well tolerated, the incidence of side effects being comparable with that for topical therapy.

CIA software — available now

Calculate with confidence:

Confidence Interval Analysis (CIA) is a computer program that takes the sweat out of calculating confidence intervals. Devised by Martin Gardner, professor of medical statistics, MRC Environmental Epidemiology Unit, University of Southampton. The program is menu driven with easy access to each chapter and to the method required within each chapter. Topics covered include calculating confidence intervals for:

- means and their differences
- proportions and their differences
- regression and correlation
- non-parametric analyses

For each method relevant intermediate statistics and the required confidence interval are produced on the screen. Complete with its own manual, the program may also be used in conjunction with the book *Statistics with Confidence*, which provides numerous worked examples. The software is available for IBM compatibles on either a 5¼" or a 3½" disk.

Price: £65.00. Educational establishments, research institutes, and the NHS — £45.95. Prices include VAT in the UK and air mail despatch abroad.

The book *Statistics with Confidence – Confidence intervals and statistical guidelines* is available price £7.95 in the UK and £9.50 abroad (BMA members £7.45 and £9.00, respectively)

ORDER FORM BRITISH MEDICAL JOURNAL, PO Box 295, London WC1H 9TE, England

Please send me copy/copies of *Confidence Interval Analysis (CIA)* at £65.00 (full price) or £45.95 (educational establishments, research institutes, and the NHS).

Just published

Many medical journals, including the *British Medical Journal*, now expect scientific papers submitted to them to contain confidence intervals when appropriate. Why? what are they? and how do you calculate them? *Statistics with Confidence* tells you. A clear explanation of the reasons for using confidence intervals is followed by detailed presentation of methods of calculation, including numerous worked examples and specially compiled tables. To make things even easier, a computer programme, Confidence Interval Analysis (CIA), for calculating confidence intervals, has been specially designed by Martin Gardner and details are available from the Publishing Department, *British Medical Journal*.

Eighth edition

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step by step instruction. Subjects covered include standard deviation, χ^2 tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation not published in the original *BMJ* series. Methods specially adapted to pocket calculators.

Price: Inland £3.00;
Abroad £4.50; USA \$8.00
BMA members: Inland £2.50;
Abroad: £4.00 USA \$7.00

Fourth impression

No doctor can afford to ignore statistics: most modern medical research uses statistics. This important and authoritative book provides clear information on designing studies, applying statistical techniques, and interpreting studies that use statistics. It can be easily understood by those with no statistical training and should be read by all those who want to keep abreast of new developments.

Price: Inland £8.95;
Abroad £11.00; USA \$19.00
BMA members: Inland £7.45;
Abroad: £10.00 USA \$17.50

Second edition

Epidemiology has its own techniques of data collection and interpretation and its necessary jargon of technical terms, and in *Epidemiology for the Uninitiated* Professors Geoffrey Rose and David Barker guide the novice expertly through the theory and practical pitfalls. The second edition of this popular *BMJ* handbook has been revised to include further details of epidemiological methods and some of their more dramatic applications, such as the investigations on the Spanish cooking oil epidemic, and AIDS.

Price: Inland £3.95;
Abroad £5.50; USA \$8.50
BMA members: Inland £3.45;
Abroad: £5.00 USA \$7.50

Non-specialists overwhelmed by too many systematic descriptions of individual disease will welcome the new approach of *ABC of Dermatology*. Here the history, clinical appearance, and pathology of a few common key conditions are discussed and then as a basis for comparison with other skin diseases. Also dealing in detail with allergic reactions, autoimmunity, acne, and infections, this handbook is **fully illustrated in colour**, providing a clear guide to assessment and treatment as well as an understanding of the histological changes underlying the clinical presentations.

Price: Inland £10.95; Abroad £13.00. BMA members: Inland £9.95; Abroad £12.00 *including postage, by air abroad.*
