

Expert information on important problems

It is vital for all doctors to keep up to date with the facts about AIDS. The second edition of *ABC of AIDS* has been completely revised to give a clear picture of the present state of knowledge about the epidemic and current approaches to treatment. It also includes two new chapters, on HIV infection related to misuse of drugs, and HIV infection in children. Edited by Michael Adler, a leading authority on the topic, the *ABC of AIDS* is a concise, authoritative guide that all medical practitioners should read.

 UK £10.95; Abroad £13.50
 (BMA members: £9.95 or £12.50)

The number and range of sexually transmitted diseases have been increasing steadily in the past few years, and the second, revised edition of the *ABC of Sexually Transmitted Diseases*, includes the most up to date figures as well as new chapters on AIDS and psychosexual problems. Doctors need to be aware that common clinical conditions such as rashes, vaginal discharge, and pelvic pain may have a sexual origin and in the new edition of this invaluable handbook Professor Michael Adler gives expert guidance on the diagnosis and management of these conditions.

August 1990
 UK £11.95; Abroad £13.50
 (BMA members: £10.95 or £12.50)

The lung is the organ most affected by the opportunistic infections that occur in patients with AIDS. Pneumocystis pneumonia occurs in up to four fifths of such patients in Europe and North America, while tuberculosis is a major factor in Africa. As the numbers of patients with AIDS increase, respiratory physicians throughout the world are more likely to be concerned in their management. In *AIDS and the Lung* experts review the problems, emphasising practical points and providing up to date information on this rapidly changing subject.

September 1990
 UK £8.95; Abroad £10.00
 (BMA members: £8.45 or £9.50)

**Think
about
it**

You make a clinical diagnosis. Do you ever consider the thought processes by which you arrived at it? Medical students and practitioners are often concerned with examples of diagnostic logic, but seldom consider them in the context of a general philosophy. Is diagnostic logic out on a limb, or is it based on the same principles as logic in general?

In *Logic in Medicine* doctors and philosophers combine to provide a coherent system of diagnostic logic with a broader view of the science and art of reasoning.

MSSVD

The Medical Society for the Study of Venereal Diseases

President: Dr M A Waugh
The General Infirmary at Leeds, Leeds LS1 3EX

The object of the Society is to bring together those interested or engaged in the diagnosis, treatment, and community medical aspects of sexually transmitted diseases. The Society meets regularly in London at the Royal Society of Medicine for the reading of papers, discussions, and presentation of cases. An out-of-London meeting is held in the Spring. Annual subscription for membership of the Society is £50.

Applications for membership are welcome and forms can be obtained from the Honorary Secretary, Dr M J Godley, Florey Unit, Royal Berkshire Hospital, Reading RG1 5AN.

1991-92 SCIENTIFIC PROGRAMME

at the Royal Society of Medicine,
1 Wimpole Street, London W1M 8AE
6.30 for 7 pm (unless otherwise stated)

Members and Guests welcome

- 1 November 1991** **Annual General Meeting**
OGM—short papers presented by junior members (submissions to Hon Sec by 11 October 1991)
- 13 December 1991** **Imaging in Genitourinary Medicine**

- 18-21 June 1992** **Spring Meeting, Dublin, Eire**
Local Organiser: Dr F Mulcahy

Antifungal therapy that's severe on the infection, not on the patient.

Prescribing information

Indications and dosage: Systemic candidiasis: 400mg on the first day followed by 200-400mg once daily. Cryptococcosis, including meningitis: 400mg on the first day followed by 200-400mg once daily. Maintenance therapy to prevent relapse of cryptococcal meningitis in patients with AIDS: at least 100mg daily. Oropharyngeal candidiasis: 50-100mg once daily for 7-14 days or longer in immunocompromised patients. Other mucosal candidal infections: 50-100mg once daily for 14-30 days. Vaginal candidiasis: single 150mg dose. Use in the elderly - as above except for those renally impaired - see data sheet. Use in children - not recommended. *Administration:* Diflucan may be administered either orally or by intravenous infusion at a rate of approximately 5-10ml/min. The dosages for the two routes are equivalent. *Contra-indications:* Hypersensitivity to fluconazole or related triazoles, pregnancy and women of childbearing potential unless adequate contraception is employed.

Warnings: Lactation: Not recommended. Renal impairment: dosage reduction may be necessary; see data sheet. *Drug interactions:* Monitor patients on concurrent anticoagulants, oral sulphonylureas, phenytoin or rifampicin. *Side-effects:* Nausea, abdominal discomfort, diarrhoea and flatulence. *Package Quantities and basic NHS Cost:* 50mg capsule, calendar pack of 7, £16.61 (PL 57/0289); 200mg capsule, calendar pack of 7, £66.42 (PL 57/0317); 150mg capsule, pack of 1, £7.12 (PL 57/0290); Bottles of 25ml and 100ml containing Diflucan 2mg/ml intravenous infusion - 25ml (50mg) bottle, £7.32; 100ml (200mg) bottle, £29.28 (PL 57/0315). Hospital prices are available on request. *References:* 1-4 Data on file, Pfizer Ltd. Further information on request.

Pfizer Limited Sandwich, Kent

Diflucan Oral/I.V. is highly effective, well tolerated therapy with a convenient, once a day dosage and administration.

Overall clinical responses in deep-seated fungal infections are impressive: 87% in systemic candidiasis¹, 96% in mucosal candidiasis² and 62% in cryptococcal meningitis.³ Tolerability is similarly impressive with adverse effects comparable to placebo.⁴

Diflucan Oral/I.V. Treating invasive fungal infection with an iron fist and patients with a velvet glove.
