## Methods and tools for HIV/AIDS estimates and projections

Edited by Helen Ward, Neff Walker, and Peter D Ghys

- i1 Maximising the global use of HIV surveillance data through the development and sharing of analytical tools *G P Garnett, N C Grassly, J T Boerma, P D Ghys*
- i5 The UNAIDS Estimation and Projection Package: a software package to estimate and project national HIV epidemics *P D Ghys, T Brown, N C Grassly, G Garnett, K A Stanecki, J Stover, N Walker*
- i10 The workbook approach to making estimates and projecting future scenarios of HIV/AIDS in countries with low level and concentrated epidemics *N Walker, J Stover, K Stanecki, A E Zaniwski, N C Grassly, J M Garcia-Calleja, P D Ghys*
- i14 Projecting the demographic consequences of adult HIV prevalence trends: the Spectrum Projection Package *J Stover*
- i19 The Asian Epidemic Model: a process model for exploring HIV policy and programme alternatives in Asia *T Brown, W Peerapatanapokin*
- i25 A global analysis of trends in the quality of HIV sero-surveillance *J M Garcia-Calleja, E Zaniwski, P D Ghys, K Stanecki, N Walker*
- i31 Uncertainty in estimates of HIV/AIDS: the estimation and application of plausibility bounds *N C Grassly, M Morgan, N Walker, G Garnett, K A Stanecki, J Stover, T Brown, P D Ghys*

Publication of this supplement has been made possible by an educational grant from the Joint United Nations Programme on HIV/AIDS (UNAIDS)
