FOURTEENTH ANNUAL GENERAL MEETING

bright, and as plainly content and happy. They are schooled, and the schooling has a religious foundation. Their natural instincts for possession and rivalry and their natural propensities to seek pleasure are, with the touch of genius, used to teach them to discipline themselves; and so exactly and successfully that no case of cross-reinfection has ever occurred there, though the children live and play together.

To see this children's home and to watch its children is a valuable and gratifying experience to all medical practitioners. All of us fortunate enough to have had this experience believe that our school teachers could do no better than to study the ingenious, kindly and humorous methods devised and practised there, with such happy results, by the Matron and her Nurses.

H. M. HANSHELL.

The President and Council of The Medical Society for the Study of Venereal Diseases wish to express to Miss Bunyon, Dr. Kathleen Brown, Mrs. Woolner, the Matron, and the other Officers of the Children's Medical Home their sincere appreciation of the hospitality extended to its members on the occasion of the Annual General Meeting.
