

*A fine product from the celebrated laboratories of
E. SCHERING—a guarantee of purity and reliability.*

ARTHIGON

By Improved Process

***For the Treatment of
Gonorrhœa in all stages***

A polyvalent gonococcal vaccine on a new principle—the water of suspension being replaced by a solution of Urotropine.

This combination brings about a mutual increase of activity. The Urotropine, acting as a non-specific stimulant, rouses the resistance of the organism, thus enabling the specific element to act more effectively.

Produces easy absorption of inflammatory exudates in EPIDIDYMITIS, PROSTATITIS, GONORRHEAL ARTHRITIS, etc.

Supplied as follows:—

Cartons containing 6 ampoules of 1 c.c. in progressive doses of 10, 30, 40, 50, 50 and 100 millions per c.c.

Bottles of 6 c.c. containing 100 millions per c.c.

Bottles of 60 c.c. containing 100 millions per c.c.
