to collect such information in a single volume. Drs Schell and Mush er edit this monograph to which 24 leading authorities have contributed. The result is a well balanced review of recent advances in the treponematoses, particularly syphilis. In the first part of the volume there is a resumé of the morphological, biochemical, and genetic aspects of the virulent treponemes. Inevitably, the papers cited in most chapters were not published later than 1980. After a short description of the clinical aspects of syphilis and yaws which should prove more useful to laboratory workers than to physicians, there is a good account of experimental infection of rabbits and hamsters with Treponema pallidum.

The third, and largest, section of the monograph is devoted to the immunology of syphilis. Cell mediated and humoral immune responses are detailed, and the mechanism of attachment of treponemes to cell surfaces is discussed.

Overall the book is well edited and provides a relatively up to date account of progress in treponemal infection. The monograph should appeal to anyone interested in the immunology and pathogenesis of syphilis. It is expensive, however, and is more likely to be purchased by libraries than by individuals.

Notice

Symposium on skin and the nervous system

The third symposium on skin and the nervous system, entitled “New methods and advances in the study of skin innervation,” is to be held from 24 to 29 March 1984 in Vienna, Austria. For further information, please contact: Professor W Gebhart, Department of Dermatology II, University of Vienna, Vienna Medical Academy for Postgraduate Education, Alser Strasse 4, A-1090 Vienna, Austria (tel: (0222) 42 13 83).

Journal of African Union Against Venereal Diseases

A new journal of STD in Africa is being launched and the first issue will appear in December 1983. It will include all aspects of STD particularly of special interest and relevance to Africa. The journal will initially be published quarterly.

Articles for forthcoming issues are required in duplicate. Annual subscriptions will be $25 in Africa and $30 from other continents. Cheques and other forms of payments should be made to AUVDT. The first issue will be sent free to all interested.

For further information, article subscription, and payments, please write to: Professor Herbert Nsanze, Editor, African Journal of Sexually Transmitted Diseases, PO Box 30588, Nairobi, Kenya.

Infections of the Genital Tract

The Royal College of Pathologists is arranging a half day (2.00 to 6.00 pm) symposium on infections of the genital tract on Tuesday 17 April 1984 in London. The symposium is open to members of the college, trainee pathologists, and workers in disciplines associated with the subject.

For further information please contact: Christine Peddle, Scientific Meetings Secretary, The Royal College of Pathologists, 2 Carlton House Terrace, London SW1Y 5AF (tel: 01-930 5861).

Obituary

PROFESSOR V S RAJAN, MD, FRCP(ED)

News of the sudden death of professor Rajan, dermatovenereologist at Middle Road Hospital, Singapore will sadden his many friends throughout the world. Most especially he will be a loss to those in the western Pacific region and south east Asia where, under the auspices of the World Health Organisation and the International Union against the Venereal Diseases and Treponematoses, he worked to increase government awareness and improve the practices of his colleagues.

His international reputation rested not only on his example, teaching, and organisational abilities, but on his research into both dermatology and venereology, particularly gonorrhoea.

His qualities did not go unnoticed at home and when his colleagues elected him to a personal chair their action was applauded. Few men grew into their job as rapidly as did Professor Rajan, and he wore his academic mantle with rare assurance. Many of us will long remember him, not only for his well used talents, but also for his grace and quiet, unfailing courtesy. RSM.

H ducreyi, simulated positive auto-inoculation by herpes simplex infection, 215*

Hepatitis B in homosexuals, prevalence and factors related to transmission, 144

Herpes, genital, arabinosyladenine monophosphate, double blind placebo controlled study, 282*

Herpes, genital, detection by tissue culture, fluorescent antibody technique with biorin-avidin, 282*

Herpes, genital, diagnosis and treatment of, 143*

Herpes, genital, double-blind trial of topical acyclovir, 143*

Herpes, genital, experimental, acyclovir treatment of, 143*

Herpes, genital, ineffectiveness of topical idoxyuridine in dimethyl sulphoxide, 143*

Herpes, genital, in Israel 1973-80, 215*

Herpes, genital, initial and recurrent, oral acyclovir in, 143*

Herpes, genital, intravenous acyclovir in, 143*

Herpes, genital, in women, clinical and urological studies, 214*

Herpes, genital, oral acyclovir in treatment of, 142

Herpes, genital, recurrent, oral acyclovir controlled trial, 143*

Herpes, genital, recurrent, patient-initiated therapy for, 143*

Herpes, genital, topical acyclovir in treatment of, 142

Herpes, genital, virus specific antibodies in sera from patients with, 143*

Herpes gestations and polymorphic eruptions of pregnancy, immunoelectron microscopy study of relationship, 347*

Herpes simplex, chronic perianal in homosexuals with acquired immunodeficiency syndrome in, 73

Herpes simplex infection simulating a positive autoinoculation for H ducreyi, 215*

Herpes simplex virus, comparison of ELISA and quantal microneutralisation test for serotyping, 214*

Herpes simplex virus, effects of genetic resistance in vaginally infected mice, 282*

Herpes simplex virus, failure of 2-deoxy-D-glucose in treatment of, 215*

Herpes simplex virus, genital infection, inapparent in college women, 282*

Herpes simplex virus, genital, treatment of first episodes with oral acyclovir, 347

Herpes simplex virus, latency in uterosacral ligaments, 143*

Herpes simplex virus proctitis in homosexual men, 347

Herpes simplex virus type 1 in CSF, recovery of 2 strains in herpetic proctitis and meningoitis, 282

Herpes simplex virus type 2, effect of phosphonoformate on symptomatic genital herpes in guinea pigs, 282*

Herpes simplex virus type 2 infection with unusual generalised manifestations, 347*

Herpes simplex virus type 2, restriction endonuclease analysis of DNA from genital isolates, 282*

Herpes simplex virus type 2, unusual serological response of two patients to an early antigen of, 143*

Herpes simplex virus types 1 and 2, comparison of typing with type specific rabbit antisera and restriction endonuclease analysis of viral DNA, 282*

Herpes simplex virus types 1 and 2, primary and recurrent concomitant genital infection, 347*

Herpes simplex virus typing by ELISA with monoclonal antibodies, 347*

Homosexuals, acquired immunodeficiency syndrome in, chronic perianal herpes simplex, 73

Homosexuals, AIDS in four, 348*

Homosexuals, characteristics of pathogenic Neisseria species isolated from, 280*

Homosexuals, gonococcal strains from, have outer membranes with reduced permeability to hydrophobic molecules, 141*

Homosexuals, hepatitis B in, prevalence and factors related to transmission, 144

Homosexuals, herpes simplex virus proctitis in, 347

Idoxyuridine, topical, in dimethyl sulphoxide, ineffectiveness in genital herpes, 143*

Infertility due to distal tube disease, increased frequency of C trachomatis serum antibodies, 142*

Israel, genital herpes in, 1973-80, 215*

Jarisch-Herxheimer reaction, role of immune complexes in, and early syphilis, 140*

Jarisch-Herxheimer reaction, studies on pathogenesis, 279

Johannesburg, H ducreyi in genital ulcers in white men in, 347*

Ketoconazole and sulfamethoxazole against C albicans, 282*

Ketoconazole, systemic, for recurrent vaginal candidosis, 73*
Leucoderma in secondary syphilis, 140*
Leucoderma of penis, reversal in man with secondary syphilis, 140*
Liver involvement with early syphilis, 69
Lymphogranuloma venereum and acute ulcerative proctitis, 74*

Meningococci and gonococci, immune and non-immune precipitation of human sera with, 141*
Metronidazole, factors affecting activity against T vaginalis, 281*
Metronidazole, sensitivity of T vaginalis to, in medium with various concentrations of iron and ascorbate, 281*

Non-gonococcal urethritis, effect of rosaramicin and tetracycline in chlamydia positive and chlamydia negative, 214

Non-gonococcal urethritis, genital mycoplasmas in, and in healthy volunteers, 214

Non-gonococcal urethritis in males, 73

Non-gonococcal urethritis, measurement of antibody to *U urealyticum* in, 281

Non-gonococcal urethritis, persistent and recurrent, without evidence of current infection, 213

Non-gonococcal urethritis, studies on aetiology of, 141

Non-specific vaginitis, diagnostic criteria and microbial and epidemiological associations, 283

Non-specific vaginitis, motile anaerobic curved rods in, 215

Norfloxacin against *N. gonorrhoeae* and urinary tract pathogens, 280

Ophthalmia neonatorum caused by penicillinase-producing gonococci, 70

Pediculosis pubis coexisting with venereal infection, 143

Pelvic inflammatory disease, aetiology, especially chlamydial, 72

Penicillin and spectinomycin in gonococcal urethritis, 141

Penicillin compared in uncomplicated gonorrhoea, 72

Penicillin, comparison with single dose cefonicid in gonococcal urethritis, 141

Penicillin concentrations in CSF and serum of syphilis patients after intramuscular, intravenous, and oral administration, 345

Penicillin G compared in gonorrhoea in women, 72

Penicillin, is it always infallible in syphilis?, 140

Penicillin v cefmenoxime in gonorrhoea, 345

Piperacillin compared in uncomplicated gonorrhoea, 72

Reiter keratitis, 73

Reiter's syndrome, a male and female disease, 73

Reiter's syndrome complicated by fulminating colitis, 214

Reiter treponeme antigen, isolation of TR-c, 70

Reiter treponeme flagellum, enzyme-linked immunosorbent assay for IgG antibodies against, 69

Rosaramicin in chlamydia positive and chlamydia negative non-gonococcal urethritis, 214

Rosoxacin in uncomplicated gonorrhoea, 141

Salpingitis, acute, chlamydial serum IgG antibodies in, measured by ELISA, 72

Scabies, an epidemiological reassessment, 347

Scabies, venereal disease in patients in, 74

Sexually transmitted diseases—audiovisual teaching aids, 215

STD, centres in Australia, 348

STD clinic patients, recreational drug usage among, 215

STD, evaluation of an advertising programme on, 144

STD in general practice, 144

STD in general practice in Northlands, New Zealand, 74

STD, medicare cards for tracing, 348

STD, multiple, 143

Sheffield, repeated gonorrhoea in, epidemiology of, 283

Spectinomycin and penicillin in gonococcal urethritis, 141

Spectinomycin compared in gonorrhoea in women, 72

Spectinomycin treatment for penicillinase-producing *N. gonorrhoeae*, emergence of resistance after, 71

Spermcides, vaginal, and gonorrhoea, 213

Sulfamethoxazole and ketoconazole against *C. albicans*, 282

Syphilis antibodies, isolation of TR-c, a Reiter treponeme antigen, 70

Syphilis, congenital, as a cause of abnormal cardiotocogram, 212

Syphilis, congenital, placental lesions in, 280

Syphilis, congenital, prevention and diagnosis, immunological aspects, 279

Syphilis control in populations previously exposed to yaws, 74

Syphilis, early experimental, serum regulation of in vitro lymphocyte responses in, 140

Syphilis, early infectious, in Denmark, 283

Syphilis, early, role of immune complexes in Jarisch-Herxheimer reaction, 140

Syphilis, early, with liver involvement, 69

Syphilis, experimental, immune complexes in, 280

Syphilis, humoral immune response to polypeptides of *T pallidum*, 140

Syphilis, is penicillin always infallible in?, 140

Syphilitic leukoderma, ultrastructural observations on melanocyte function, 280

Syphilis, lymphocyte transformation and the effect of circulating immune complexes, 140

Syphilis, nodular secondary, 69

Syphilis, penicillin concentrations in CSF and serum after intramuscular, intravenous and oral administration, 345

Syphilis, primary, *T pallidum* in peripheral nerve tissue, 212

Syphilis, secondary, leucoderma in, 140

Syphilis, secondary, reversible, penile leucoderma in, 140

Syphilis serology, AMHA-TP test for screening, 212
Syphilis serology, ELISA using sodium desoxycholate-extracted treponemal antigens, 140*
Syphilis serology, enzyme-linked immunosorbent assay for IgG antibodies against Reiter treponeme flagellum, 69*
Syphilis serology, fluorescent treponemal antibody absorption double staining test evaluation, 280*
Syphilis serology, modern, 279*
Syphilis serology, purification of Tr-6, a Reiter treponeme protein antigen, 212*
Syphilis serology, tests, 212*
Syphilis serology: T pallidum haemagglutination assay, miniaturisation, in blood transfusion centre screening, 279*
Syphilis, transfusion, survival of T pallidum in donor blood, 279*

Syphilis, treatment of, 212*

Tetracycline and erythromycin compared in C trachomatis positive male and female partners, 142*
Tetracycline in chlamydia positive and chlamydia negative non-gonococcal urethritis, 214*
Thiamphenicol compared in gonorrhoea in women, 72*
Treponema pallidum and cytomegalovirus specific IgM antibodies, rapid detection with passive haemagglutination, 279*
T pallidum and human polymorphs, interaction between, 345
T pallidum antigen, evaluation of microenzyme-linked immunosorbent assay with, 69*
T pallidum antigens, expression in E coli, 69*
T pallidum Bosnia A strain antigens, ability of macrophages to process and present, in experimental syphilis, 70*
T pallidum, effect of route of infection with, in vitro cellular response to treponemal antigens, 212*
T pallidum, immune complexes in experimental rabbit infection, 70*
T pallidum, immune system responses towards, 280*
T pallidum, independent confirmation of in-vitro cultivation, 70*
T pallidum in peripheral nerve tissue of syphilitic chancre, 212*
T pallidum, molecular protein characterisation, 280*
T pallidum (Nichols), murine monoclonal antibodies specific for, 70*
T pallidum outer membrane, solubilisation by detergents to release axial filaments, 69*
T pallidum polypeptides, humoral immune response in human syphilis to, 140*
T pallidum surface-associated antigens concealed by an outer inert layer, 70*
T pallidum, survival in donor blood, 279*
T pallidum, ultrastructure during phagocytosis and dissolution by macrophages, 69*
T pertenue in golden hamsters, isolation and transportation in, 69

Treponemes, acquired resistance of hamsters to challenge with homologous and heterologous virulent, 140*

Trichomonas vaginalis, alternative pathway of activation to complement, 142*
T vaginalis antibody in human cervicovaginal secretions, 214*
T vaginalis, antigen specific proliferation responses to peripheral blood lymphocytes, 281*
T vaginalis, canine prostatic secretions kill, 73
T vaginalis, factors affecting activity of metronidazole against, 281*
T vaginalis, host plasma proteins on surface of, 142*
T vaginalis, identification of membrane proteins of, 347*
T vaginalis phagocytosis of N gonorrhoeae, 345*
T vaginalis, polymorph chemotaxis to secretions of pathogenic and non-pathogenic, 142*
T vaginalis proteinases, analysis of, 347*
T vaginalis, purine and pyrimidine metabolising activities in extracts of, 281*
T vaginalis, rapid diagnostic method, 73*
T vaginalis, role of cytoskeleton in natural cell-mediated cytotoxicity against, 281*
T vaginalis, sensitivity to metronidazole in medium with various concentrations of iron and ascorbate, 281*
T vaginalis, serum-free modified Trichosel medium for, 142*

Trichosel medium, serum-free modified for T vaginalis, 142*

United States army, venereal disease in, 1775-1900, 144*
Ureaplasma urealyticum genital infection, subsequent pregnancies among couples treated for, 346
U urealyticum in infertile women by laparoscopy, 346*
U urealyticum, measurement of antibody to, by ELISA and detection of antibody responses in patients with non-gonococcal urethritis, 281*
Urethral infections in men and women, 348*
Urethritis in men: benefits, risks, and costs of alternative strategies of management, 281*
Uterosacral ligaments, latency of herpes simplex virus in, 143*

Venereal diseases in United States army 1775-1900, 144*

Warts, cervical, isoantigen studies using immunoperoxidase, 348*
Warts, urethral, a new topical treatment, 283*
Warts, vulval, treatment with laser, 283*

Yaws, late, 279*
Yaws, syphilis control in populations previously exposed to, 74*
Index to authors of articles abstracted, 1983
