

# STARTING NOW

This year the *BMJ* launches a new series of books, the Memoir Club, featuring reminiscences and works of general interest by medical men and women.

"The craft of the essay is no less demanding than the science of the clinic. We are fortunate that there remain such excellent practitioners of both as Sir Christopher."

*Br Med J* 1987; 294: 1681

The first title in the series is *Doctors in Science and Society* by Christopher Booth.

Director of the Clinical Research Centre at Northwick Park, president of the BMA, and former professor of medicine at the Royal Postgraduate Medical School, Sir Christopher Booth is also a respected medical historian. In this collection of essays he examines the lives and times of some eighteenth century medical scientists, among them Sir Samuel Garth, FRS, physician to the Duke of Marlborough and friend and fellow poet of Alexander Pope; and Dr John Dawson, a country practitioner and largely self taught mathematical genius, twelve of whose pupils went on to become senior wranglers at the University of Cambridge.

Not concerned only with history, *Doctors in Science and Society* also considers the role of modern medical science and its relationship with technology, and the development and function of two major medical institutions, the Medical Research Council and the Royal Postgraduate Medical School. Written with elegance and authority, this fascinating collection is a must for anyone interested in the past and future of medical science.
