This Journal, founded by the Medical Society for the Study of the Venerable Diseases, published original work on the investigation and treatment of genitourinary and allied disorders, and review articles, correspondence, and abstracts.

ADVICE TO AUTHORS
Papers for publication, which will be accepted on the understanding that they have not been and will not be published elsewhere and are subject to editorial revision, should be sent in duplicate to Prof A Mindel, Academic Department of Sexual Health Medicine, Sydney Hospital, Macquarie Street, Sydney 2000, GPO Box 1614, Sydney, NSW, Australia. Tel: 61 2221 2800; Fax: 61 221 5810. All authors must give signed consent to publication. Submitted papers must be sent with full details of requirements for manuscripts in the Vancouver style (BMJ 1982;284:1766–70) are given in Uniform requirements for manuscripts submitted to biomedical journals, available from the Publishing Manager, British Medical Journal, BMA Publishing Group, BMA House (50p post free). Brief details are as follows:

(1) SCRIPTS (including correspondence and book reviews) must be typewritten on one side of the paper in double spacing with ample margins. Two copies should be sent.

(2) EACH SCRIPT should include, in the following order: a brief summary (structured summaries are preferred), typed on a separate sheet, outlining the main observations and conclusions followed by up to three key words suitable for use in indexing; the text divided into appropriate sections; acknowledgements; references; tables, each on a separate sheet; and legends for illustrations.

(3) THE TITLE of the paper should be as brief as possible.

(4) THE NUMBER OF AUTHORS should be kept to the minimum, and only their initials and family names used.

(5) ONLY THE INSTITUTION(S) where work was done by each author should be stated.

(6) SI UNITS must be used. If old fashioned units are used, SI units should be given in parentheses or, for tables and figures, a conversion factor given as a footnote.

(7) ONLY RECOGNISED ABBREVIATIONS should be used.

(8) ACKNOWLEDGEMENTS should be limited to workers whose courtesy or help extended beyond their paid work, and supporting organisations.

(9) FIGURES should be numbered in the order in which they are first mentioned in the text. Captions should be typed on a separate sheet. DIAGRAMS: use thick, white paper and insert lettering lightly in pencil. PHOTOGRAPHS: should be marked lightly on the back with the author’s name and indicating the top, and should not be attached by paper clips or pins. They should be trimmed to include only the relevant section (and will be reproduced 68 or 145 mm wide) to eliminate the need for reduction. Photomicrographs must have internal scale markers. Radiographs should be submitted as photographic prints, carefully prepared so that they bring out the exact point to be illustrated.

(10) TABLES should be numbered, have titles, and be typed on separate sheets. Please avoid large tables and use the format which appears in current issues.

(11) REFERENCES should be numbered consecutively the first time they are cited and identified by arabic numbers in the text, tables, and legends to figures. Authors must take full responsibility for the accuracy of their references, and a list should be kept as short as practicable. It should be in the order in which references are first mentioned, and should include (in the following order), journal: author’s name and initials, title of paper, name of journal (in full or abbreviated according to the list in Index Medicus), year of publication, volume number, and first and last page numbers; book: author’s name and initials, full title, edition, place of publication, publisher, and year of publication. When a chapter in a book is referred to, the name and initials of the author of the chapter, title of the chapter, place of publication, edition, and publisher, name of book, name and initials of the editor, and “ed.” Names of journals no longer published or not in Index Medicus should be given in full—for example, British Journal of Venerable Diseases.

PROOFS Contributors receive one proof, and should read it carefully for printers’ errors and check the tables, figures, legends, and any numerical, mathematical, or other scientific expressions. Alterations should be kept to a minimum.

REPRINTS A limited number of reprints may be ordered at cost from the Publishing Manager when the proofs are returned.

NOTICE TO SUBSCRIBERS
This Journal is published bimonthly. The annual subscription rates are £136.00 and $237 in the USA. Subscribers may pay for their subscriptions by Access, Visa, or American Express by quoting on their orders the credit or charge card preferred, the appropriate personal account number, and the expiry date of the card. Orders should be sent to the Subscriptions Manager, Genitourinary Medicine, BMA Publishing Group, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed locally through any leading subscription agent or bookseller. (For the convenience of readers in the USA, subscription orders, with or without payment, can be sent to: British Medical Journal, PO Box 408, Franklin, MA 02038, USA. All inquiries, however, including those regarding air mail rates and single copies already published, should be addressed to the publisher in London.) Second class postage paid, Railway NJ Postmaster. Send address changes to: Genitourinary Medicine c/o Mercury Airfreight International Ltd Inc, 2323 Randolph Avenue, Avenel, NJ 07001, USA.

NOTICE TO ADVERTISERS
Applications for advertisement space and for rates should be addressed to the Advertisement Manager, Genitourinary Medicine, BMA Publishing Group, BMA House, Tavistock Square, London WC1H 9JR.

Permission is not, however, required to copy abstracts of papers or of articles on condition that a full reference to the source is shown. Multiple copies of the contents of the publication without permission is always illegal

ISSN 0266-4348
Lipoiligosaccharide biosynthesis in Neisseria gonorrhoeae: cloning, identification and characterization of the el1,5 heptosyltransferase 1 gene (rfaC).

Chlamydia

Persistent chlamydiae: from cell culture to a paradigm for chlamydial pathogenesis.

Chlamydia trachomatis antigens: role in immunity and pathogenesis.

Unsuspected Chlamydia trachomatis infection and in vitro fertilization outcome.

Epidemiologic study of Chlamydia trachomatis infection in pregnant women.

Epidemiology of infection due to Chlamydia trachomatis in Manitoba, Canada.

Randomised comparison of amoxycillin and erythromycin in treatment of genital chlamydial infection in pregnancy.

Use of the polymerase chain reaction for the detection of Chlamydia trachomatis from endocervical and urine specimens in an asymptomatic low-prevalence population of women.

Influence of volume of sample processed on detection of Chlamydia trachomatis in urogenital samples by PCR.

The use of a confirmatory assay to increase the sensitivity and specificity of the Chlamydiadynzyme test.

Detection of amplified Chlamydia trachomatis DNA using a microtiter plate-based enzyme immunoassay.

Diagnosis of Chlamydia trachomatis urethral infection in symptomatic and asymptomatic men by testing first-void urine in a ligase chain reaction assay.

Diagnosis of Chlamydia trachomatis infections in men and women by testing first-void urine by ligase chain reaction.

Novel, ultrasensitive, Q-beta replicase-amplified hybridization assay for detection of Chlamydia trachomatis.

Comparison of characteristics of Q-beta replicase-amplified assay(295,113),(719,173)

Pharmacokinetics of azithromycin and erythromycin in human endometrial epithelial cells and in cells infected with Chlamydia trachomatis.

Reactivation of persistent Chlamydia trachomatis infection in cell culture.

Role for CD8(+) T cells in antichlamydial immunity defined by Chlamydia specific T-lymphocyte clones.

CD8(-) T lymphocyte-mediated lysis of chlamydial infected cells using an endogeous antigen pathway.

Protective cytotoxic T lymphocytes are induced during murine infection with Chlamydia trachomatis. MN STARNBACH, MJ BEVAN, MF LAMPE. J Immunol 1994;153:5183.

Genetic variability among Chlamydia trachomatis reference and clinical strains analyzed by pulsed-field gel electrophoresis.

Comparison of two panels of monoclonal antibodies for determination of the 32-kilodalton protein gene.

The 32-kDa glycoprotein of Chlamydia trachomatis is an acidic protein that may be involved in the attachment process.

Cytoskeletal requirements in Chlamydia trachomatis infection of host cells.

Candidiasis

Resistance of Candida species to fluconazole.

Antibody response to candida and its use in clinical practice.

Karyotyping of Candida albicans isolates obtained longitudinally in women with recurrent vulvovaginal candidiasis.

Bacterial vaginosis

Syphilis and other treponematoses

Human papillomavirus infection

Vulvar intraepithelial neoplasia III: a clinical study of the outcome in 113 cases with relation to the later development of invasive vulvar carcinoma. RF JONES, DM ROWAN. Obstet Gynecol 1994;84:741.

Contraceptive and reproductive risks for cervical dysplasia in southwestern Hispanic and non-Hispanic white women. TM BECKER, CM WHEELER, NS MCGOUGH. Int J Epidemiol 1994;23:913.

Detection of human papillomavirus types in cervical lesions of patients from Taiwan by the polymerase chain reaction. CH WU, MP LIN, MC CHANG, SC NO. Sex Transm Dis 1994;21:309.

Role of human papillomavirus in determining the HLA associated risk of cervical carcinogenesis. 

Detection of DNA and E7 transcripts of human papillomavirus types 16, 18, 31 and 33, TGFβ and GM-CSF transcripts in cervical cancers and precancers. 

L HO, G TERREY, B MANSELL, R BUTLER, A SINGER. Arch Virology 1994;139:79.

Presence of antibodies to seven human papillomavirus type 16-derived peptides in cervical cancer patients and healthy controls. 

Antibodies to the E4, E6 and E7 proteins of human papillomavirus type 16 in patients with HPV-associated diseases and in the normal population. 

A comparison of commercially available probes for in situ hybridization to human papillomavirus DNA. 

HR KRIEGMAN, W TERRELL, CM HULETT. Mod Path 1994;7:734.

Polymerase chain reaction for monitoring human papillomavirus contamination of medical personnel during treatment of genital warts with CO2 laser and electrocoagulation. 

Laryngeal papillomatosis: molecular, histopathological and clinical evaluation. 

Editorial—Navigating the descent into papillomavirus hell. 

Identification and assessment of known and novel human papillomaviruses by polymerase chain reaction amplification, restriction fragment length polymorphism, nucleotide sequence and phylogenetic algorithms. 

Identification of five novel human papillomavirus sequences in the New Mexico tribe population. 

A novel human papillomavirus sequence from an international cervical cancer study. 

Epidemiology and partial nucleotide sequence of four novel genital human papillomaviruses. 

Interaction of papillomaviruses with cell surface proteins. 

PCR in situ hybridization detection of HPV 16 in fixed CaSkii and fixed SiHa cells. 

Human papillomavirus types 6 and 11 have antigenetically distinct strongly immunogenic conformality dependent neutralizing epitopes. 

The role of the E1 and E2 proteins in the replication of human papillomavirus type 31b. 

MG FRATTINI, LA LAMINS. Virology 1994;204:799.

p53 immunoreactivity in cervical intraepithelial neoplasia and non-neoplastic cervical squamous epithelium. 

The E6 protein of human papillomavirus type 16 functions as a transcriptional repressor in a mechanism independent of the tumor suppressor protein, p53. 

RG ETSCHEID, SA FOSTER, DA GALLOWAY. Virology 1994;205:583.

Cervical/vaginal dysplasia of transgenic mice harbouring human papillomavirus type 16 E6-E7 genes. 

Comparison of the properties of the E6 and E7 genes of low- and high-risk cutaneous papillomaviruses reveal strong conserved sequences in common. 

A mutational analysis of the amino terminal domain of the human papillomavirus type 16 E7 oncoprotein. 

A switch region determines the cell type-specific positive or negative action of YY1 on the activity of the human papillomavirus type 18 promoter. 

Identification of a naturally processed HLA A2021-restricted viral peptide from cells expressing human papillomavirus type 16 E6 oncoprotein. 

Analysis of type-restricted and cross-reactive epitopes on virus-like particles of human papillomavirus type 33 and in infected tissues using monoclonal antibodies to the major capsid protein. 

The E2 transcriptional repressor can compensate for SP1 activation of the human papillomavirus type 18 early promoter. 

Nuclear localization and transforming activity of human papillomavirus type 16 E7-β-galactosidase fusion protein: characterization of the nuclear localization sequence. 

K FUJIMAKA, M FURUSE, KI IWABE, H MAKIG, O YOSHI. Virology 1994;204:789.

Lipofoot-mediated immortalization of human prsotastic epithelial cells of normal and malignant origin using human papillomavirus type 18 DNA. 

Cervical cytology and colposcopy Histological study of squamous atypia on Pap smears. 

HC ARJANDIES, G TRAWNIES, HH WANG. Mod Path 1994;7:920.

Risk factors for cervical intraepithelial neoplasia: differences between low- and high-grade lesions. 

Public health and social aspects Sexually transmitted diseases: a neglected public health priority. 

Sexually transmitted diseases, sexual behaviour and cocaine use in inner-city women. 

The association of consensual sexual intercourse during childhood with adolescent health risk and behaviours. 

Condom availability in schools: the need for improved program evaluations. 

Microbiology and Immunology Predicting abnormal microbial population levels in the vaginal ecosystem. 

Extragenital infection due to Mobiluncus mulieris: case report and review.

Adherence of Ureaplasma urealyticum to human epithelial cells.
DGE SMITH, WC RUSSELL, D THIRKELL. Microbiology 1994;140:2893.

Dermatology

Lichen sclerosus et atrophicus. A histological, immunohistochemical and electron microscopic study.
Y MIHARA, M MIHARA, Y HAGAI, S SHIMAO. Arch Dermatol Res 1994;284:434.

The vulvovaginal-gingival syndrome of lichen planus—the clinical characteristics of 22 patients.
D EISEN. Arch Dermatol 1994;130:1379.

Squamous cell carcinoma arising in vulval lichen planus.

Malignant melanoma of the vulva: evaluation of prognostic factors with emphasis on DNA ploidy in 75 patients.

Balanitis circumscripta plasmacellularis.

Basal cell carcinoma of the penis: case report and review of the literature.

Pyoderma gangrenosum of penile skin.

Miscellaneous

Cervical but not urinary excretion of cytomegalovirus is related to sexual activity and contraceptive practices in sexually active women.

Association between cervical inflammation and cervical shedding of human immunodeficiency virus DNA.

Desquamative inflammatory vaginitis: a new subgroup of purulent vaginitis responsive to topical 2% clindamycin therapy.

Vaginismus: an important factor in the evaluation and management of vulvar vestibulitis syndrome.

Histology and ureaplasma urealyticum culture in 63 cases of first trimester abortion.

Mycoplasma genitalia in the joints of two patients with arthritis.

Reactive arthritis: a favorable two year course and outcome, independent of triggering agent and HLA-B27.

Randomised comparative trial and cost analysis of 3-day antimicrobial regiments for treatment of acute cystitis in women.

Phase I clinical trial of vaginal mucosal immunization for recurrent urinary tract infection.

Pattern of sexually transmitted diseases in a Malagasy population.

The morning-after pill—how long after?

Standardized protocols for condom breakage and slippage trials: a proposal.

Contraceptive efficacy and acceptability of the female condom.

Clinical experience with thalidomide in the management of severe oral and genital ulceration in conditions such as Behcet's disease: use of neurophysiological studies to detect thalidomide neuropathy.

MR urography: technique and application.

Papaverine topical gel for treatment of erectile dysfunction.

Corrective procedures for penile shortening due to Peyronie's disease.

Primary adenoacinar carcinoma of the penis.

Lymph node metastasis from carcinoma in situ of the penis: a case report.

Benign female perirectal masses.
