Key messages

- ▶ International backpackers attending the clinic had higher rates of genital chlamydial infection than a local comparison population.
- ▶ International backpackers have high rates of partner change, hazardous levels of alcohol consumption and low rates of condom usage, creating an environment conducive to STI transmission.
- ▶ Backpackers should be a priority population for sexual health promotion and access to services.

Acknowledgements The authors would like to thank Heng Lu and Ben Judd for data management.

Competing interests None.

Ethics approval This study was conducted with the approval of the South Eastern Sydney Illawarra Area Health Service Ethics Committee.

Contributors CE developed the study idea and assisted with study design; HW analysed the data; AMM designed the study and wrote the manuscript; BD designed the study and edited the manuscript. All authors reviewed the study manuscript.

Provenance and peer review Not commissioned; externally peer reviewed.

Corrections

Hettiarachchi N, Ashbee HR, Wilson JD. Prevalence and management of non-albicans vaginal candidiasis. *Sex Transm Infect* 2010;**86**:99–100. The surname of the first author was misspelled. The correct name is Hettiarachchi not Hetticarachchi. The journal apologises for this error.

Sex Transm Infect 2010;**86**:250. doi:10.1136/sti.2009.040386corr1

Jurstrand M, Christerson L, Klint M, *et al.* Characterisation of *Chlamydia trachomatis* by ompA sequencing and multilocus sequence typing in a Swedish county before and after identification of the new variant. *Sex Transm Infect* 2010;**86**:56–60. There was an error in the order of the references. The corrected version is available online.

Sex Transm Infect 2010;**86**:250. doi:10.1136/sti.2009.037572corr1

Bertozi SM, Padian N, Martz TE. Evaluation of HIV prevention programmes: the case of Avahan. *Sex Transm Infect* 2010;**86**:i4–5. There were several errors in this editorial. Reference 9 referred to an unpublished paper by Vickerman, not to the paper by Pickles, which was published in the same supplement.

Secondly, the statement “Finally Ramesh *et al* came closest to examining the impact of Avahan on FSW using dynamic transmission models. They used prevalence from two cross-sectional surveys....” is incorrect. Ramesh does not use a dynamic transmission model—this is referring to one of the two modelling papers. Ramesh uses a time-trend analysis from two cross sectional surveys.

Finally, the name Alary is misspelled Alery twice in the editorial.

The journal apologises for these errors.
