

Supplemental Table 1. Association between vaginal douching and endometritis by endometrial infection with BV-associated organisms

		Histologically Confirmed Endometritis		
		Endometrial infection with one or more BV-associated organisms¹ N=356 RR (95% CI)	Endometrial infection with all BV-associated organisms¹ N=45 RR (95% CI)	No Endometrial infection N=177 RR (95% CI)
Douching	≥ 2 times/month	1.16 (0.93-1.45)	1.23 (0.75-2.01)	0.97 (0.54-1.75)
	< 2 times/month	Ref.	Ref.	Ref.

¹ BV-associated organisms: *Atopobium vaginae*, *BVAB1*, *Sneathia amnionii*, or *Sneathia sanguinegens*
